

DERMAQUEST

Skin Care

Since 1999, Dermaquest has crafted the absolute finest skincare products available for every skin type, for every skin condition, for home and professional care. DermaQuest embraces their role as the leader in plant stem cell technology and as a global award winning, top international skincare brand. Dermaquest's Tri-factor illuminates the balance of protection, strength and regeneration of the skin through the powerful combination of peptides, antioxidants and plant stem cells. By stabilizing these vital ingredients together in each product, we ensure the promise of a highly functioning skin; simultaneously addressing a variety of complex skin concerns at a cellular level. With innovative products that address every need and desire, advanced delivery systems and our unique layering technology, our exclusive and unique line takes skincare to the next level of excellence and that is pure skin science.

SHARPLIGHT
Laser Services

Fractional skin resurfacing

Effectively treat a range of concerns, including wrinkles, fine lines, sunspots, age spots, textural concerns, and even acne scarring! SharpLight's resurfacing treatment is a gentle and efficient procedure that reduces signs of aging and rejuvenates the skin. These impressive results are achieved by replacing old, damaged cells with new, healthy ones quickly, effectively and safely. Our revolutionary Er:YAG laser produces a micro epidermal peel, which through a thermo-mechanical reaction, removes the problematic areas on the top layer of the skin. The fresh layer that grows has an improved texture, reduced or disappeared rhytids, wrinkles, scarring, spots and an overall renewed radiance.

Face	\$450
Other areas can be treated as well, Just ask :)	\$100+

Tattoo Removal

Laser technology is used to target the ink of the tattoo and apply pulses of light to decompose the tattoo's pigment clusters. This pulsed light safely passes through the skin's outer layer and is absorbed by the ink; the light is then converted to heat, which breaks the ink down into much smaller particles. The body's lymphatic system then filters these particles out over several weeks and, as this natural elimination occurs, the tattoo fades.

Pricing based on size in inches	\$70+

Carbon Correcting laser peel

AKA Hollywood facial

SharpLight's Q-Switch technology sends energy in rapid bursts focusing on the epidermis. The carbon is blasted away by the laser energy, aiding in the removal of debris found in the pores and dead skin cells. Thermal effect produced by the laser has the ability to stimulate collagen production, leaving flawless and youthful looking skin. A perfect way to prepare your skin for any of our amazing treatments.

Other areas can be treated as well, Just ask :)	\$100+

Vascular/Pigmentation

SharpLight's VP2 uses pulses of intense light to eliminate and/or lighten pigmented and vascular lesions. This treatment is a fast, non-invasive procedure.

Individual spot	\$50
Cheeks and nose	\$150

Hair Removal

SharpLight's innovative and safe DPC laser provides lasting hair reduction/removal with minimum discomfort. SharpLight's advanced technologies, based on pulsed light or photoepilation, enable personalized, precise treatments that achieve effective, permanent results. Using these technologies, the hair reduction is achieved when the energy is transformed to heat in the active growth follicles, coagulating the follicle and limiting re-growth. The technologies' high heat power delivers noticeable results in less time – and these results are targeted so as to protect the surrounding skin.

Hydrojelly Mask

Add a Hydrojelly mask to almost any service for added hydration and benefits and relaxation. So many Hydrojelly options to choose from! Add on price starting at \$25 

Skin rejuvenation

Skin rejuvenation gives a younger, glowing look to your skin. It simultaneously treats the three main elements of sun-damaged, environmentally-polluted and aging skin by coagulating blood vessels, eliminating pigmented spots, shrinking pore size and improving skin texture. There are no signs of skin irritation after the treatment. You can even do it over your lunch break.

Photo facial	\$150

Chest	\$175
Hands	\$75

Acne

Treatment of acne using pulsed light is a drug-free treatment alternative. Acne affects up to 80% of individuals at some time in their life. SharpLight™ systems provide results in the treatment of mild and moderate inflammatory acne, by reducing the number of papules and pustules by up to 75%. This is achieved using three effective, safe and reliable clinical mechanisms: visible blue light absorption to destroy the bacteria, yellow light to coagulate the feeding blood vessels and infrared light to dry the lesions.

Half face	\$60
Full face	\$100

Shoulders	\$150
Back	\$200

Contouring

A pain free and enjoyable treatment that provides beautiful and long lasting results. This safe and effective technology stimulates neocollagenesis and eliminates fat cells while improving the architecture of the dermal layers.
