Hyperpigmentation and Mature Skin.

# Cure Ampoules

Ampoules are supercharged serums that address so many different skin concerns. They contain a highly concentrated formulation encapsulated within single glass vials containing 2-3 applications each. This preserves the integrity of the product and allows it to have no contact with the air until it's being applied. Ampoules contain ingredients like peptides, growth factors, precious oils, actives, and a medley of antioxidant-rich botanical ingredients to help nourish the skin and fight free radicals. The ingredients depend on what the ampoule is targeted to treat.

Apply the ampoule in the morning or evening after cleansing and toning skin. Apply just a couple of drops directly to the skin and gently blend throughout the face and neck or use the entire ampoule to coat face, neck, chest, and shoulders. Follow with your moisturizer.
